

HARISH B

Software Developer — Java Full-Stack

+91-8778872188 — harishbarani1014@gmail.com — linkedin.com/in/harishbarani1014

Professional Summary

Entry-level Software Developer with hands-on experience building and deploying Spring Boot applications across the full software delivery lifecycle—from REST API development and database design to Docker containerization and CI/CD automation. Completed an 8-month DevOps internship at Allianz Technology covering Java, Git, Linux, Jenkins, Docker, Kubernetes, and AWS fundamentals. Passionate about building scalable backend systems and modern DevOps pipelines while continuously learning new technologies.

Education

Bachelor of Technology – Information Technology

2020 – 2024

CGPA: 8.02

Technical Expertise

Core Java	Java, OOP, Collections Framework, Streams, Lambda Expressions
Frameworks	Spring Boot, REST APIs
Frontend	HTML5, CSS3, JavaScript
Databases	MySQL, MongoDB, H2 Database
DevOps	Docker, Jenkins, Kubernetes, Terraform, Ansible, Git, GitHub, Shell Scripting
Cloud	AWS EC2, Linux Administration

Professional Experience

DevOps Intern – Allianz Technology

Jan 2025 – Aug 2025

- Completed an 8-month structured technical training covering Java, Git, Linux, DevOps, CI/CD, and cloud fundamentals.
- Worked with Git/GitHub using branching strategies, pull requests, merge conflict resolution, and collaborative workflows.
- Independently learned Docker, Jenkins, and Kubernetes to complete a mentor-assigned sprint project within deadline.
- Containerized Spring Boot applications using Docker.
- Built automated CI/CD pipelines using Jenkins.
- Created Kubernetes Deployment and Service manifests for application deployment.
- Documented complete deployment procedures with implementation notes and screenshots.
- Gained hands-on exposure to AWS EC2 and cloud deployment fundamentals.

Project Repository

<https://github.com/Harishbarani/Java-Containerized-App-Deployment>

Projects

Expense Tracker — Spring Boot, JavaScript, Docker, Jenkins, Kubernetes

<https://github.com/Harishbarani/Expense-Tracker>

- Developed a full-stack expense management application using Spring Boot backend and JavaScript frontend.
- Designed REST APIs for expense management and categorization.
- Containerized the application using Docker.
- Automated build and deployment using Jenkins Pipeline.

- Deployed application using Kubernetes Deployment and Service manifests.

Progressive Web App – Library Management System

<https://github.com/Harishbarani/Progressive-Web-App-MERN-Stack>

- Developed a MERN Stack based Progressive Web Application.
- Designed MongoDB schemas for books, users and lending records.
- Implemented offline support using Progressive Web App features.
- Participated throughout the SDLC from requirement gathering to deployment.

Intelligent Security Camera System

- Developed an AI-powered surveillance system using Python and YOLO.
- Collected, cleaned and labeled datasets for object detection.
- Built a real-time threat detection system.
- Secured 2nd Prize in the College Project Expo.

Certifications

- NPTEL – Principles of Management
- NSS Volunteer Certificate – NAAC Support
